PART 1

Quick start

The essentials for opening an activity only to students who meet what the report says.

What it is and what it is for

Adds a **"Restrict access" condition** to Moodle that opens an activity or a section according to what the **Training Evidence Report** (`local_efreport`) knows about the student: whether they **meet the minimum requirements**, how many **assessments** they have completed, whether they have **passed**, or whether their **training period has ended**.

- Open the **final exam** only to students who have completed **75% of the assessments**.
- Open an **extra module** or the **diploma** only to students who have **passed**.
- Open a **resit activity** to students who have **not passed** once their period has ended.
- It **combines** with the other restrictions (completion, date, active time and so on) using AND / OR.

Minimum requirements

- **Moodle 5.1, 5.2 or 5.3**, with administrator rights to install plugins.
- **Requires** `local_efreport` **2.28.1 or later.** Moodle blocks the installation if it is missing or older.
- For the assessment and pass conditions, the course must have **assessments enabled** in the report settings or a **grade to pass** in the gradebook. Otherwise the editor warns you and the condition is never met.

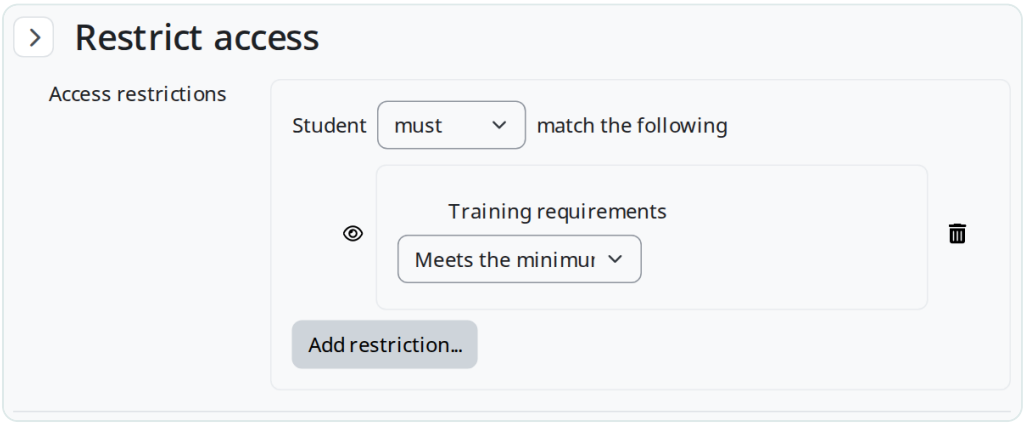

Install in 3 steps

1. Go to **Site administration → Plugins → Install plugins** and upload the file `availability_efreq_vX.zip` .
2. Click **Install plugin from the ZIP file** and, on the database upgrade screen, **Continue**.
3. Done: the **"Training requirements"** condition is now available under "Restrict access".

Set up the restriction in 4 steps

1. Edit an **activity or section** → **"Restrict access"** section → **"Add restriction..."**.
2. Choose **"Training requirements"** from the list.
3. Select the **Condition**; for assessments, enter the **% of assessments** (75 by default).

4 **Save**. If you wish, combine it with other restrictions using AND / OR.

The condition in the "Restrict access" editor.

3 key tips to get started

RECOMMENDED

Before restricting by assessments, enable **Assessments** in the report settings and check, under "Activities that count as assessments", which activities are counted.

TIP

Use the **eye icon** in "Restrict access" to decide whether the locked activity is **shown greyed out with the reason** (recommended) or **hidden entirely**.

WATCH OUT

When in doubt, closed: without efreport, without assessments or a grade to pass, without requirements shown in the report or without an end of period, the condition is **never met**, **not even when negated** ("must not" does not open the activity to everyone just because a setting is turned off). The editor warns you in red when you choose the condition.
The time that counts is the time **measured by the clock** (not the estimated time from before the clock was in place): it may be slightly less than the report total, never more.

PART 2

Full guide

All the details and the special cases.

1 The five conditions

Condition	Met when…
Meets the minimum requirements of the course or their group	The report says the student meets them: in audited training (the Training Evidence Report's **Audited training** setting on the course or on the student's group), the minimum time and the minimum assessments; in any other course, the conditions the manager has ticked.
Has done at least a given percentage of the assessments	The assessments done within the student's period reach the percentage you set. Requires assessments enabled in the report.
Has passed	The student's final grade is at or above the course's grade to pass.
Has not passed (including not graded)	The student's final grade is below the grade to pass, or there is no grade. Requires a grade to pass in the course.
Their training period has ended	The end date of the student's period (enrolment, group or course) plus the report's grace period has already passed.

All of them can be **negated** with Moodle's "must / must not".

2 Requirements and the efreport dependency

The plugin calculates nothing on its own: it asks the requirements function of `local_efreport`, the same one the report uses, so that the activity opens to exactly the students the report shows as meeting the requirements. Each student's period is resolved as in the report: enrolment dates, group dates or course dates.

> **PERFORMANCE**
>
> The checks on a page are served by the same batch queries as the report: there are no per-student queries.

3 Installation (web, manual and CLI)

- **Web**: Site administration → Plugins → Install plugins → upload the zip.

- **Manual**: unzip into `availability/condition/efreq/` and visit Site administration → Notifications.
- **CLI**: `php admin/cli/upgrade.php --non-interactive`.

4 Adding and combining the condition

Just like any other Moodle restriction: **Restrict access → Add restriction... → Training requirements**. It combines with the others using AND / OR. Example for the diploma: *Active time* from the Time Restriction **and** *Training requirements: Meets the minimum requirements of the course or their group* **and** *Training requirements: Has passed*.

> **ISSUING THE DIPLOMA**
>
> If you use the report's **automatic issuing** of certificates, there is no need to restrict the diploma: the report issues it only to the students entitled to it. This condition is for **content**.

5 Typical use cases

- **Final exam**: "Has done at least a given percentage of the assessments", set to 75%. That way nobody reaches the exam without the follow-up assessments that Spain's FUNDAE® training scheme (formación bonificada) requires.
- **Extension module**: "Has passed".
- **Resit**: "Has not passed (including not graded)" **and** "Their training period has ended".
- **Closing section**: "Meets the minimum requirements of the course or their group".

6 What the student sees

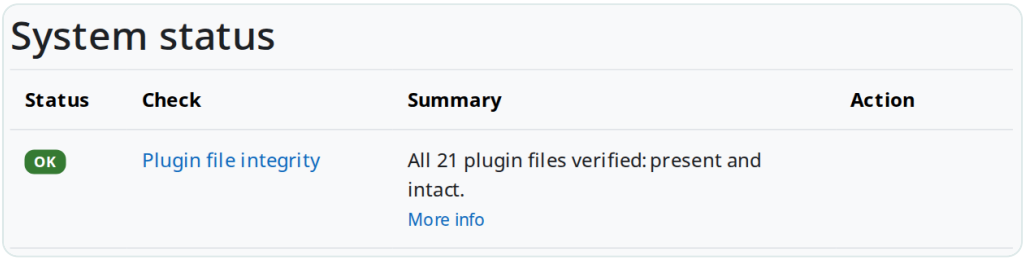

Final exam

Not available unless: You complete at least 75% of the assessments

The text is fixed and contains no personal data about the student. The condition is re-evaluated **when the page loads**.

7 Installation integrity check

Every plugin zip ships with an **integrity manifest**. After installing or updating, open **Site administration → Reports → System status** and look for "Plugin file integrity".

8 Other eLearning Fácil plugins

- **local_efreport** (Training Evidence: Time, Activity & Evaluation Report): the Training Evidence Report, with time, assessments, requirements, pass or fail and certificates. Essential.
- **availability_eftime** (Training Evidence: Time Restriction): restriction by active time.
- **local_efcomms** (Training Evidence: Communications Report), **local_efdossier** (Training Evidence: Group Dossier), **local_efalerts** (Training Evidence: Automatic Alerts), **local_efready** (Training Evidence: Course Ready Check), **block_eflinks** (Training Evidence: Report Links), **block_efprogress** (Training Evidence: My Progress): the rest of the Training Evidence Pack.

9 Frequently asked questions

Why does it never open? Because the course does not have assessments enabled, or has no grade to pass, or the report does not consider that the student meets the requirements. Check the student's detail in the report: the line "Minimum time ✓ · Minimum assessments ✗" tells you exactly what is missing.

Does it work for sections? Yes, like any other restriction.

What if I uninstall efreport? The restricted activities stay closed until you remove the condition.
