PART 1

Quick start

The essentials to get the block working in a few minutes.

What it is and what it does

Adds a **block of shortcuts** to the **training evidence** reports inside the course: time, communications, logs and grades. A **single place** where teachers and auditors find everything at a glance.

- Links to the **Training Evidence Report** (`local_efreport`) and to the **Communications Report** (`local_efcomms`), **under the title you have configured** for each one.
- Links to Moodle's own **Logs** and **Grades**.
- Each link appears **only if** its destination is installed and the user has permission to open it.
- **Configurable block title** and role-based access (students **do not** see it).

Minimum requirements

- **Moodle 5.1, 5.2 or 5.3**, with administrator rights to install plugins.
- Works **on its own**: `local_efreport` and `local_efcomms` are **optional**; the block shows the links for whatever is installed.
- Stores no personal data (it only displays links).

Install in 3 steps

1. In **Site administration → Plugins → Install plugins**, upload the file `block_eflinks_vX.zip` .
2. Click **Install plugin from the ZIP file**, then **Continue** and **Upgrade Moodle database now**.
3. Done: you can now **add the block** to any course.

Add the block to a course

1. Open the course and turn on **Edit mode**.
2. In the block drawer, **Add a block → Training Evidence: Report Links**.
3. (Optional) Set its **title** and place it wherever you like.

3 key tips to get started

RECOMMENDED

Add the block to every course **whose training you have to prove**: it gives teachers and auditors **quick access** to the reports, with no hunting through menus.

WATCH OUT

Students do not see the block (or its links). This is by design: the reports are for teachers, managers and auditors.

TIP

The block **hides itself** from anyone without permission to view it, and if a viewer has permission but no report is available to them, it simply says "No reports are available for your role in this course." It never gets in the way of anyone who should not see it.

PART 2

Extended guide

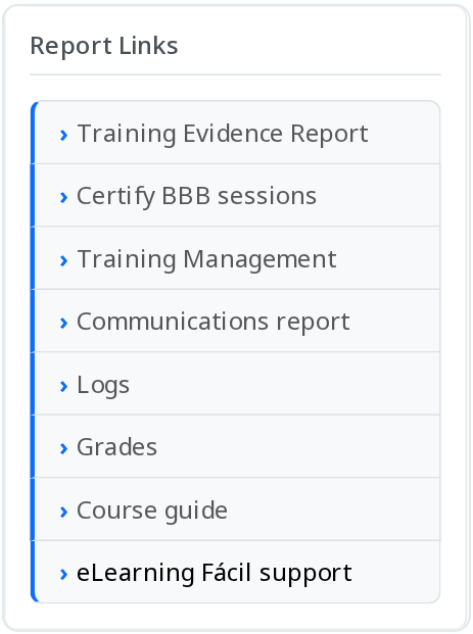

Every detail of use, configuration and permissions.

1 What the plugin does in detail

It is a **course block** that gathers, in one place, the shortcuts to the training evidence reports. It shows up to **four report links**, each one subject to the destination existing and the user having permission to open it:

Link	Where it goes	Shown when…
Training Evidence Report	`local_efreport` (under its configured title)	the plugin is installed and you have `local/efreport:viewreport`
Communications Report	`local_efcomms` (under its configured title)	the plugin is installed and you have `local/efcomms:viewcounts`
Logs	The course logs (Moodle core)	you have `report/log:view`
Grades	The Grader report (Moodle core)	you have `gradereport/grader:view`

This is how the block looks in a course (example with all four links available):

The block inside the course, with the shortcuts to the reports.

IT USES THE TITLES YOU HAVE ALREADY SET

The efreport and efcomms links show **the same title** you have given each report (site-wide or per course). The block speaks your client's language.

2 Requirements

- **Moodle 5.1 to 5.3** (`supported = [501, 503]`).
- The `local_efreport` and `local_efcomms` plugins are **optional**: the block shows the links for whatever is installed (Logs and Grades belong to Moodle core).
- **Privacy:** the block **stores no personal data** (it implements the Privacy API *null provider*); it only displays links.

3 Installation (web, manual and CLI)

Method 1 — Web interface (recommended)

1. **Site administration → Plugins → Install plugins**.
2. Drag the plugin ZIP in and click **Install plugin from the ZIP file**.
3. Confirm and **upgrade the database** when prompted.

Method 2 — Manual file copy

1. Unzip the file and copy the `eflinks` folder into `moodle/blocks/` (in Moodle 5.x, `public/blocks/`).
2. Go to **Site administration → Notifications** and follow the wizard.

Method 3 — Command line

Copy the folder and run:

```
php admin/cli/upgrade.php
```

TIP

After installing, run `php admin/cli/purge_caches.php` so that the block appears in the "Add a block" list.

4 Add and position the block

1. Open the course and turn on **Edit mode** (toggle at the top right).

2. Open the **block drawer** and click **Add a block**.
3. Choose **Training Evidence: Report Links**.
4. **Drag** the block to the position you prefer (side column, top area…).

> **ONE BLOCK PER COURSE**
>
> The block can only be added **inside a course** (not on the site home or the Dashboard), and **one per course**. For several courses, add it to each one.

5 Configure the block

With Edit mode on, open the block's **actions menu** (the three dots) → **Configure Report Links block**:

- **Block title**: change it if you wish; leave it empty to show the default title in each user's language ("Report Links" in English).
- **Link border colour** new : eight colours for the border and accents of the block's links. Match your client's branding or tell courses apart. The site-wide default is set in the plugin settings (**Default border colour**); the option **"— Use the site default —"** keeps it.
- **Up to 5 extra links** per instance (**Extra link 1: name** and **Extra link 1: URL**, the full address starting with http:// or https://): add your own shortcuts (virtual classroom, course handbook, client support…). Everyone who sees the block sees them, including an auditor with no report access.
- Moodle's standard options for **where this block appears**.

> **THE AUTOMATIC LINKS LOOK AFTER THEMSELVES**
>
> The report links appear on their own, depending on what is installed and on each user's permissions. That includes **Certify BBB sessions** with its pending count (shown only to certifiers who can open the report) and, with efreport, the link to **Training Management**, the suite page with the dossier, the checklist, the alerts and every other tool the user may use. The 5 extra links are yours. This configuration **travels with course backups** automatically.

6 Who sees the block important

Access has a **double check**: first the block's capability, and then each link is checked against the capability of its report. Default result:

Role	Sees the block?
Student	No: neither the block nor the links
Teacher (editing and non-editing)	Yes
Manager	Yes
Site administrator	Yes
Auditor (custom role)	Only if the client grants the permission (§7)

Block capabilities:

- `block/eflinks:view` : view the block (Teacher, Non-editing teacher, Manager).
- `block/eflinks:addinstance` : add the block to a course (Teacher, Manager).

WHY STUDENTS DO NOT SEE IT

If the viewer does not have `block/eflinks:view` , the block **returns empty content** and Moodle does not display it. And even if they could see it, each link also requires the capability of its report (which students do not have either). Two locks.

7 Access for the auditor

For an **auditor** to see the block and its links, their read-only role must include `block/eflinks:view` and the capabilities of the reports you want them to consult.

- **Recommended:** when you create the auditor role, **base it on Non-editing teacher** → it inherits `block/eflinks:view` .
- Or grant by hand `block/eflinks:view` + `local/efreport:viewreport` + `local/efcomms:viewcounts` (+ logs and grades where appropriate).

READY-MADE AUDITOR ROLE (XML)

The auditor role preset is shipped with the Training Evidence Report plugin (`local_efreport` 2.49.1 or later: `roles/inspectorfundae_en.xml` , in the plugin folder and in its zip, already named "Auditor"). It is configured for the whole family, this block included. Import it once per site, after installing the plugins, in **Site administration → Users → Permissions → Define roles → Add a new role → Use role preset**. Then assign it **per course**.

8 Integrity check of the installation new

Every zip ships with an **integrity manifest**. After installing or updating, open **Site administration → Reports → System status**: the row "Plugin file integrity" must read **OK**. If it shows **Error**, reinstall the plugin from its zip (if it happens again, extract the zip with your hosting provider's file manager) and purge all caches.

9 Other eLearning Fácil plugins

This block gathers the **Training Evidence Pack** reports in one place. It is sold on its own and is also part of the Pack. These are the eLearning Fácil plugins, a family that works the same way, together or on their own:

Training Evidence Pack

Your training evidence, ready for an audit. Time, activity and evaluation report with a reliable clock (inactivity, training period, 75 % assessments), report of communications with the tutor, course dossier in a ZIP you can keep for the 4 years required by Spain's FUNDAE® training scheme (formación bonificada), block of report links and activity access based on active time. With a group record for several training actions or companies within one course.
elearningfacil.com/pack-fundae-moodle

Also in the Pack

Automatic Alerts for students and tutors (not started, dropping out, final stretch, assessments, certificate deadline); **Course Ready Check**, the manager checklist that confirms the course is compliant before it starts; and **My Progress** (free), the block where each student sees their time and what is still to do.

Class Manager

Sell courses by the seat and rent classrooms on your Moodle. Your client enrols their own learners from their course; you set the seats and the access period, and each student receives their access by email without anyone sending it by hand.
elearningfacil.com/alquila-moodle-por-aulas-plugin

Bulk Certificate Manager

Issue and download a course's certificates in one go (Workplace and Custom certificate), with filters by who qualifies, and keep a record of delivery.

Time Clock (free)

Measures each student's real active time in the course. It is the entry point: if you install the Pack later, everything measured is kept.

More information

They all work the same way, together or on their own. See them, try them and request them at **elearningfacil.com** · **info@elearningfacil.com**.

10 Frequently asked questions

Symptom	Cause / solution
I cannot see the block in "Add a block"	Is it installed, and is Edit mode on? Purge caches after installing.
The block shows no links	No reports are available for your role: permissions are missing or the report plugins are not installed.
The communications link is missing	`local_efcomms` is not installed, or you do not have `local/efcomms:viewcounts`.
A student says they cannot see the block	Correct: students do not have `block/eflinks:view`.
I want a different name for the block	Block actions menu → Configure Report Links block → "Block title".
