GUIDE

The student's block

Their progress in the course at a glance: what is done, where they are and what is left.

1 What it is and what it is for

My Progress is a course block that shows **each student their own progress**: a ring with the percentage of activities completed and one mark per activity, so they know what they have done, where they are and how much is left.

- **Progress ring** with the percentage and "N of M" activities.
- **One mark per activity**: ✓ done · ● you are here · ○ pending. Every mark links to its activity.
- **Encouragement messages** from 60% and at 100%, with texts you can change.
- **A live list**: activities added or removed during the course appear and disappear on their own.
- It uses **Moodle's official activity completion**, whatever the method (view, grade…): the block only reflects it and changes nothing.
- Lightweight and built **mobile-first**. It stores no personal data.

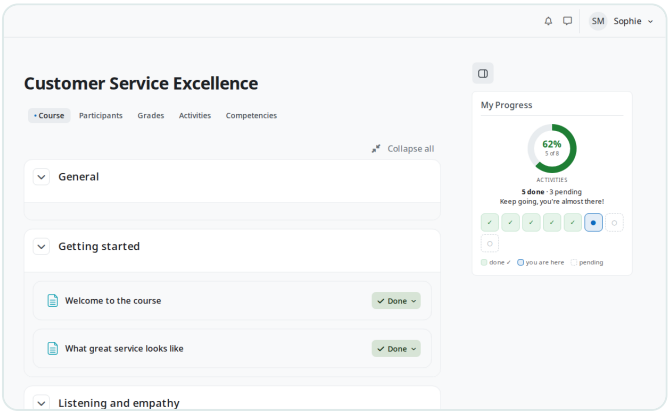

2 Installation

1. **Back up your site before installing**: database, moodledata folder and code. It is good practice with any plugin.
2. **Site administration → Plugins → Install plugins**: upload the ZIP and confirm.
3. In the course, turn **Edit mode** on, open the block drawer and choose **Add a block → My Progress**.
4. Check with a student account that the block appears with their activities.

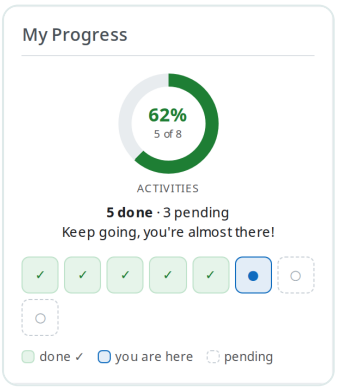

> **FIRST THINGS FIRST: ACTIVITY COMPLETION**
>
> The block counts the activities that have **completion enabled**. If none has it, students see nothing; teachers then see a hint in the block explaining why.

Requirements: Moodle™ 5.1, 5.2 or 5.3 · PHP 8.2 or later · MySQL/MariaDB or PostgreSQL.

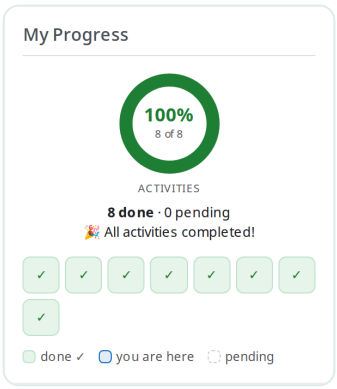

3 What the student sees

The block on the course page, usually in the side drawer, next to the course content.

5 of 8 done: the ring, the encouragement from 60% and the marks.

At 100%: “All activities completed!”.

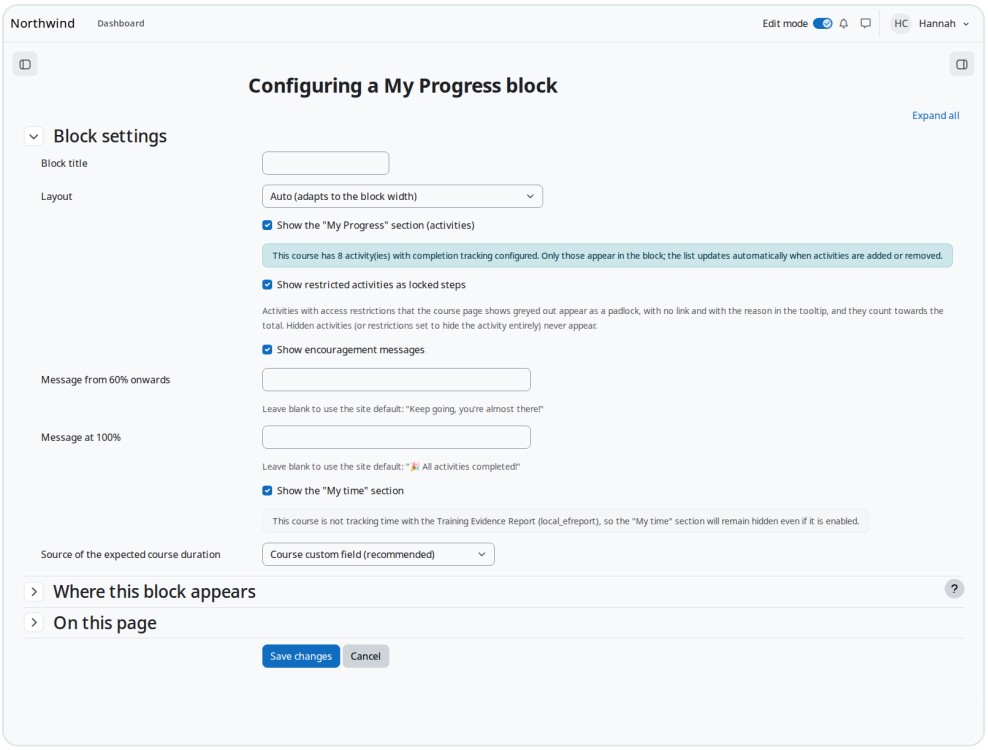

Mark	What it means
✓ **done**	Activity completed. If it was completed with a failing grade, the mark is amber and says so.
● **you are here**	The first pending activity the student can open: where to carry on.
○ **pending**	Activity not completed yet.
padlock: locked	A restricted activity (by date, by completing another one first…) that the course page shows greyed out. No link; hovering over it, or tapping it on a phone, shows the reason.
✓ **done outside the period**	Only with the eLearning Fácil report installed: an activity completed outside the student's training period (course dates, their group sheet or their enrolment). Drawn greyed with a dashed border, counted apart (“N outside the period”) and left out of the ring, exactly as the report does.

- **Locked activities count towards the total** from day one, so “N of M” doesn’t jump as they unlock.

- **Hidden** activities, activities restricted to **another group** and restrictions set to hide entirely **never appear** and don’t count.
- The 100% message never says “course completed”: course completion may depend on criteria the block doesn’t see.

4 Block settings

With edit mode on: block menu → **Configure My Progress block**. Each course has its own.

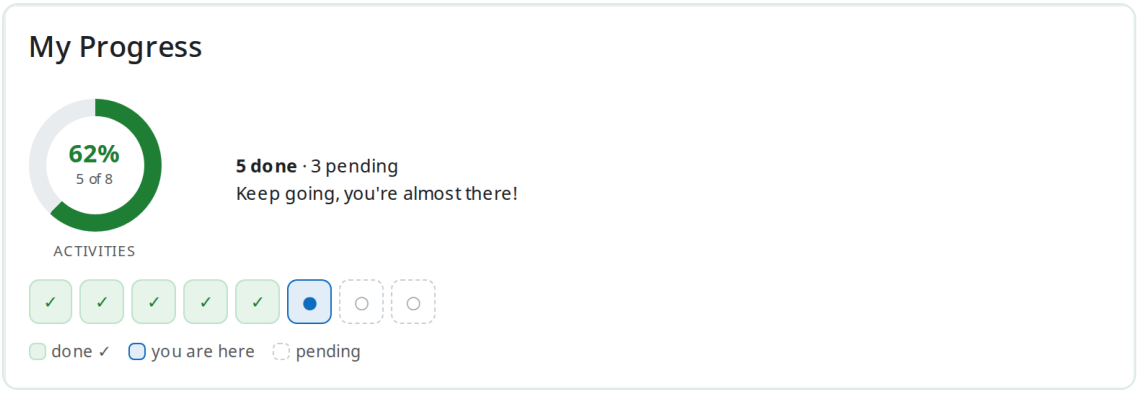

Setting	Default	What it does
Block title	My Progress	Change it if you want another name.
Layout	Automatic	Automatic, vertical or horizontal (section 5).
Show the "My Progress" (activities) section	Yes	The ring and the marks. Below it, the form tells you how many course activities have completion.
Show restricted activities as locked steps	Yes	The padlocks from section 3. Untick it to show only accessible activities.
Show encouragement messages	Yes	The 60% and 100% messages.
Message from 60% onwards / Message at 100%	Empty	Texts for this course only. Left empty, the site texts are used.
Show the "My time" section and **Source of the expected course duration**	Yes · course field	Only work with eLearning Fácil's reporting plugin (section 7).

5 Vertical or horizontal layout

Under **Layout** you choose how the block is arranged:

- **Automatic** (recommended): the block looks at its real width; in a side column it is vertical and in a wide area it switches to horizontal. It works with any modern theme.
- **Vertical**: for the side column.
- **Horizontal**: the ring and counters in a row and the marks across the full width, for a wide area such as above the course content.

The block in horizontal layout, in a wide area.

6 Site settings

In **Site administration → Plugins → Blocks → My Progress**:

Setting	What it does
Default message from 60%	Out of the box, “Keep going, you are almost there!”. Each course can change it.
Default message at 100%	Out of the box, “All activities completed!” with a party icon. Each course can change it.
Course custom field holding the expected duration	Short name of the course field holding the expected hours (accepts “30”, “30 h”, “7.5”, “90 min” or hh:mm). Only the “My time” section uses it.

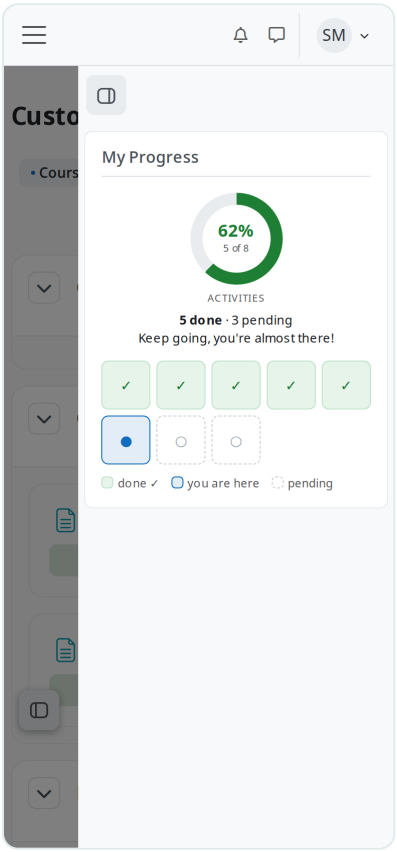

7 The “My time” section

The block can also show a **My time** section: the time spent and, with an expected course duration, a second ring with the percentage and the time left.

> **ONLY WITH ELEARNING FÁCIL’S REPORTING PLUGIN**
>
> This section appears **only if the site has eLearning Fácil’s reporting plugin installed** (`local_efreport` , a paid plugin that is part of the Training Evidence Pack) and the course measures time with it. Without it, the section stays hidden even when ticked, and everything else works the same. In the block settings, a note tells you whether the course measures time.

- With that plugin installed, the activities ring also uses **the same figures as its report**: the block and the report cannot disagree.
- The expected duration comes from the course field (section 6), is set manually in the block, or is left out to show the total time only.
- Figures are rounded down: 29 h 59 min is not 100% of 30 h.

8 Accessibility and mobile

On a phone, inside the block drawer.

- Built **mobile-first**: the marks wrap into rows to fit the width.
- On touch screens, the **first tap** on a mark shows a bubble with the activity name and status; the second tap opens it.
- Every mark has its own **screen-reader label** (“Topic 2 — done ✓ · click to open”), and states don’t rely on colour alone: they have a symbol and a legend.
- Marks are ordinary links: you can move through them with the **keyboard**.

9 Who sees it, permissions and privacy

- The block is shown only to users with **their own progress in the course**: enrolled students. Each one sees only their own data.
- Teachers and managers don't see it as students do; if the course has no activity with completion, they see a hint.
- The `block/efprogress:addinstance` capability lets editing teachers and managers add the block.
- It **stores no personal data** (declared privacy provider). Its settings travel with course backups.

Free software (GPL v3), built to the Moodle™ plugin guidelines: no external calls or third-party resources, automated tests and code review on every release.

10 Frequently asked questions

A student doesn't see the block

Check that they are enrolled as a student and that some activity has completion enabled.

An activity doesn't appear

Only activities with completion appear. Hidden ones, those for another group and those with a restriction that hides them entirely never appear.

A restricted activity doesn't show a padlock

Its restriction is set to hide entirely, the activity is hidden, or "Show restricted activities as locked steps" is unticked in the block.

At 100% the course doesn't show as completed

The block counts activities; course completion has its own criteria (grades, dates…). That is why the message says "All activities completed!" and not "course completed".

I ticked "My time" and nothing shows

That section needs eLearning Fácil's reporting plugin measuring time in the course (section 7).

ELEARNING FÁCIL

More plugins by eLearning Fácil

Built for training providers, companies and academies that work with Moodle™.

Time Clock

Free: measures each student's real time, only while the tab is active, with an Excel and CSV report.

Direct SCORM player

Free: one click and the student is right inside the SCORM, full screen and with no new windows.

Class Manager

Sell courses by the seat: your client signs up their students, with capped seats, an access period and an automatic welcome email.

the Training Evidence Pack

Time you can prove, PDF reports, completion by time spent and an evidence file for every group.
