GUIDE

Course Ready Check: the manager's checklist

Nothing gets forgotten when you set up a course that has to pass an audit.

1 What it is and what it is for

Course Ready Check is the **set-up checklist** for an audit-ready training course: **around 18 automatic checks** against the requirements of online training (course record, time, traceability, communication, information for students and audit) plus **manual items** for whatever the system cannot know on its own. All summed up in a **"Course ready" percentage** you can read at a glance.

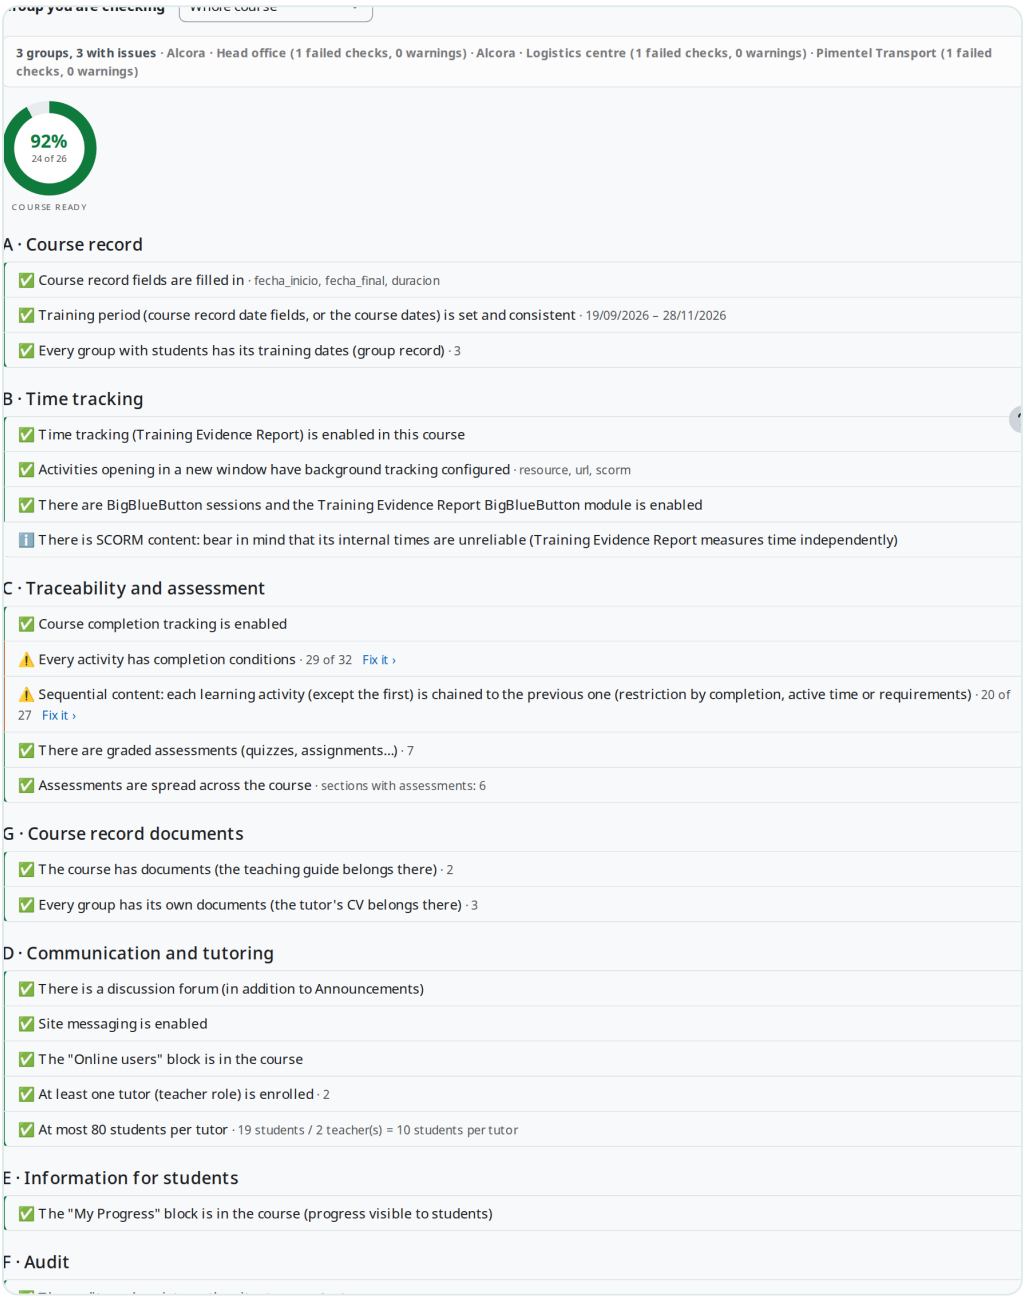

- Each check shows ✓ / ✗ / ⚠ and a **"Fix it"** link that takes you straight to the right screen.
- Key checks: **at most 80 students per tutor**, **sequential content**, course record fields, **auditor enrolled**, SCORM notice.
- The checks that belong to the Training Evidence Pack (time tracking, communications and so on) only appear when that plugin is installed.

2 Requirements and installation

- Moodle **5.1 to 5.3**. It does not depend on any other plugin (it detects the others when they are present).
- Install the zip from **Site administration → Plugins → Install plugins**.
- Anyone with the `local/efready:view` capability can open it (by default, Teacher and Manager). The **auditor does not see it**: it is an internal preparation tool.

3 Opening the checklist

In the course, open the **"More"** menu and choose **"Training Evidence: Course Ready Check"**. If the Training Evidence Report is installed, the "More" menu shows **"Training Management"** instead: open that page and the checklist is the card **"Course Ready Check — manager checklist"**.

The **percentage** ring, the **groups** of checks with their ✓/✗/⚠ and "Fix it" links, and the **manual items** at the bottom.

4 The automatic checks

Grouped the way an auditor looks at a course:

- **Course record**: course dates, hours, required fields (file number, training action, company tax ID and so on).
- **Time tracking**: active time tracking in the course (Training Evidence Report), hours configured.
- **Traceability and assessment**: completion tracking enabled, **sequential** content (each learning activity chained to the previous one by completion, active time or requirements; a restriction by group or date alone does not count, and forums and chat are left out of the sequence), **graded** assessments spread across the course.

- **Communication and tutoring**: visible forum, messaging, a tutor with a teacher role and **at most 80 students per tutor**.
- **Information for students**: teaching guide, platform help.
- **Audit**: auditor role defined and **enrolled in the course**.

The **"Course ready" percentage** counts each passed check as one point, each warning as half a point and each failed check as zero; informational items (, such as the SCORM notice) do not score, and you will never see 100% while something is still pending. The **"Fix it"** link only appears when your role can open that page.

> **NOTHING IS STORED**
>
> The automatic checks are **recalculated live** every time you open the page: fix something, reload and the ✓ appears straight away.

New in 0.5.0: the checklist per group new

When each group in the course is a separate training programme (per-group records enabled in the Training Evidence Report), a selector labelled **"Group you are checking"** appears above the list. With **"Whole course"** selected, a summary reads "3 groups, 1 with issues" with a link to each group. When you pick a group, five checks read **that group** instead: the course record fields (its group record, inheriting from the course whatever it leaves empty), the dates, the tutor, the **ratio of 80** (teachers and students in the group) and its documents; the rest are still checked for the whole course. There is also a new block, **G · Course record documents**: a warning if the course has no documents (the teaching guide belongs there) and a warning for each group with no documents of its own (the tutor's CV belongs there); since nobody can tell which document is which, it is a warning, and the manual item confirms it.

New in 0.4.0

- **Assessments are spread across the course**: a warning if there is only one, if all of them are in the last section or if all of them are in the same section. Spain's FUNDAE® training scheme, for example, requires assessments during the training, not only at the end.
- **Every group with students has its training dates (group record)**: only shown when per-group records are enabled (Training Evidence Report). It fails, naming the groups, if any of them has no start and end date, either its own or inherited from the course.

5 The manual items

- **Four come predefined**: "Teaching guide uploaded at the start of the course", "Platform help/manual accessible to students", "Satisfaction survey (official template) available on the platform" and "Training group registration submitted (outside Moodle)". You can also add your **own items** for each course with **"Add item"**.
- When you tick an item with **"Mark as done"**, the checklist records **who ticked it and when** (clear responsibility in a team).
- They count towards the percentage just like the automatic checks.

6 Site settings

In **Site administration → Plugins → Local plugins → Training Evidence: Course Ready Check** you set the **"Required course record fields"** (each organisation asks for its own), the **"Auditor role short name"** and **"Check that the course has a chat"** (off by default: most organisations do not use Moodle's chat).

7 Backups and file integrity

- The **manual items travel** with course backups (.mbz), with their ticked state and, if the backup includes users, who ticked them. Moodle only restores them into a **new course** or when restoring over an existing one with **"Overwrite course configuration"**; if you empty the course first ("Delete the contents of this course and then restore"), the old ticks go with the contents. The automatic checks do not need this (they are recalculated in the destination course).
- After installing, open **Site administration → Reports → System status**: "Plugin file integrity" should read **OK**. If it reports an error, reinstall the zip and purge all caches.

When a course is deleted (since version 0.3.0), its checklist state is removed automatically: a clean deletion, with no orphaned data left in the database.

8 Other eLearning Fácil plugins

The checklist is sold on its own and is also part of the **Training Evidence Pack**; it makes use of whatever it finds installed. This is the eLearning Fácil family of plugins: they all work the same way, together or on their own:

Training Evidence Pack

Evidence of the training, ready for an audit. Time, activity and evaluation report with a reliable clock (inactivity, training period, 75% assessment rule), communications report for the tutor, Group Dossier in a ZIP you can keep for as long as your scheme requires (4 years under Spain's FUNDAE® scheme), Report Links block and access to activities by active time. With a group record for several training programmes or companies in one course. elearningfacil.com/pack-fundae-moodle

Also in the Pack

Training Evidence: Automatic Alerts for students and tutors (not started, dropping out, final stretch, assessments, certificate deadline); **Training Evidence: Course Ready Check**, the manager checklist that confirms the course is compliant before it starts; and **Training Evidence: My Progress** (free), the block where each student sees their time and what they still have to do.

Class Manager

Sell courses by the seat and rent classrooms in your Moodle. Your client enrols their own students from inside the course; you set the number of seats and the access period, and each student receives their access details by email without anyone sending them by hand. elearningfacil.com/alquila-moodle-por-aulas-plugin

Bulk Certificate Manager

Issue and download all the certificates of a course in one go (Workplace and Custom certificate), with filters for who has qualified, and a record of every delivery.

Training Evidence: Time Clock (free)

Measures each student's real active time in the course. It is the starting point: if you install the Pack later, everything already measured is kept.

More information

They all work the same way, together or on their own. You can see them, try them and request them at **elearningfacil.com** · **info@elearningfacil.com**.

9 Frequently asked questions

Symptom	Cause / solution
I cannot see the checklist in the "More" menu or on the "Training Management" page	You lack the `local/efready:view` capability (Teacher and Manager have it by default).
A check from the Pack does not appear	That plugin is not installed: dependent checks hide themselves automatically.
The ratio shows ⚠ and I have tutors to spare	Check that the tutors hold the expected role in the course (Teacher or Non-editing teacher).
I restored the course and the ticks are missing	Manual ticks travel in the backup, but they are only restored into a new course or with "Overwrite course configuration"; if the backup predates version 0.2.0, make a new one.
